INTRODUCTION
This remote control system was developed to provide a safe, reliable and user-friendly remote control system for gas heating appliances.

TRANSMITTER
The transmitter operates on (2) 1.5V AAA batteries. It is recommended that ALKALINE batteries always be used for this product. Be sure the batteries are installed with the (+) and (-) ends facing the correct direction, and are fully charged.

KEY SETTINGS
1. ON - - - - Turns appliance on
2. OFF - - - - Turns appliance off
3. MODE - Cycles control between manual and thermo mode.
4. SET - - - - Sets temperature in thermo mode.

LCD - LIQUID CRYSTAL DISPLAY
1. Display - - - - - Indicates current room temperature.
2. Fahrenheit or Celsius Indicates degrees Fahrenheit or Celsius.
3. Flame - - - - - Indicates appliance is on.
4. Room - - - - - Indicates remote is in thermo mode.
5. Temperature - - - - Appears during manual operation.
6. Set - - - - - Appears when setting the desired temperature in thermo mode.

SETTING °F / °C SCALE
The factory setting for temperature is °F. To change the displayed temperature, press the ON and OFF keys at the same time. Follow this same procedure to return to °F.

MANUAL FUNCTION
ON OPERATION
Press the ON key to turn the appliance on. (The flame icon will appear on the LCD screen).

OFF OPERATION
Press the OFF key to turn the appliance off. (The flame icon will disappear from the LCD screen.)
THERMOSTAT FUNCTION

- Press the MODE key until the LCD screen shows the word “ROOM.” (See Thermo Mode graphic)
- To adjust set temperature, press and hold the SET key until the desired temperature is reached. The temperature range is 99°F (32°C) to 45°F (6°C). (See Thermo Set graphic)
- The LCD screen will display the set temperature for 3 seconds, then it will flash the set temperature for 3 seconds. It will default to show the room temperature.
- The flame icon will appear when the control calls for heat. (See Thermo On graphic). The flame icon will disappear when the appliance reaches its set temperature. (See Thermo Off graphic).
- Press the MODE key to disengage the Thermo Mode. “ROOM” will disappear from the LCD screen.

NOTE: The thermo feature operates the appliance whenever the room temperature varies a certain number of degrees from the set temperature. This variation is called the “swing” or temperature differential. This feature lets the appliance turn off and on 2 ºF (1 ºC) above or below the set temperature of the room. This is to cushion the number of times the appliance is turned on and off.

THERMO UPDATING FEATURE - TRANSMITTER

When in thermo mode, the transmitter reads the ROOM temperature every 2 minutes, checks the room temperature against the SET temperature then sends a signal to the receiver.

RECEIVER

When plugged into a standard 110-120 VAC receptacle, the remote receiver operates on commands from the transmitter or from the slide switch on the face of the receiver (This switch is to be used during a power outage to operate the appliance manually).

- ON: will manually turn on the appliance.
- REMOTE: will allow use of handheld transmitter. If the system does not respond to the transmitter on initial use, check the battery positions in the remote. If that does not work, see the LEARNING TRANSMITTER TO RECEIVER section.
- OFF: will disable the remote receiver.
- It is suggested that the slide switch be placed in the OFF position if you will be away from your home for an extended period of time.

The remote receiver is manufactured with a “dry contact” relay in its circuitry that operates like an on/off switch. However, no power or current passes from the 110-120 VAC input side to the wires leading from the output side of the remote receiver.

INSTALLATION

Protection from extreme heat is very important. The remote receiver should be kept away from temperatures exceeding 130°F. Extreme heat can cause damage, which is not covered under warranty.

- Before installation, make sure you turn the slide switch to OFF. After installation, make sure you turn the slide switch to REMOTE.
- The remote receiver can be placed on the fireplace hearth or under the fireplace behind the control access panel.
- Use the wires attached to the remote receiver to connect to the gas valve or the electric module (piggyback connectors have both male & female terminals for flexibility).
- Be sure that the connectors do not touch each other or other bare metal surfaces; this will cause the appliance to turn on. The connectors may be wrapped with electrical tape to prevent this.

WARNING

This remote control system must be installed exactly as outlined in these instructions. Read all instructions completely before attempting installation. Follow instructions carefully during installation. Any modifications of this remote control or any of its components will void the warranty and may pose a fire hazard.

Consult gas appliance manufacturer’s instructions and wiring schematics for proper placement of all wires. All electronic modules are to be wired to manufacturer’s specifications.

The following wiring diagrams are for illustration purpose only. Follow instructions from manufacturer of gas valve and/or electronic module for correct wiring procedures. Improper installation of electric components can cause damage to electronic module, gas valve and remote receiver.

Skytech 1410TH-A
WIRING INSTRUCTIONS

A qualified electrician should install the remote control system.

MILLIVOLT VALVES

- Connect one wire from the remote receiver to the TH terminal on the gas valve.
- Connect the other wire from the remote receiver to the TH/TP terminal on the gas valve.

MILLIVOLT SYSTEM CHECK

- Ensure that the pilot flame is lit.
- Slide the 3-position button on the remote receiver to the ON position. The main gas flame (i.e., the fire) should ignite.
- Slide the button to OFF. The main flame should extinguish (the pilot flame will remain on).
- Slide the button to REMOTE, then press the ON button on the transmitter to change the system to on. The main gas flame should ignite.

ELECTRONIC SPARK IGNITIONS

The remote control receiver can be connected, in series, to a 24VAC transformer to the TR (transformer) terminal on the ELECTRONIC MODULE. Connect the hot wire from the 24VAC transformer to either of the wires on the remote receiver. Connect the other wire from the receiver to the TH (thermostat) terminal on the ELECTRONIC MODULE.

ELECTRONIC SPARK SYSTEM CHECK

- Slide the 3-position button on the remote receiver to the ON position. The spark electrode should begin sparking to ignite the pilot. After the pilot flame is lit, the main gas valve should open and the main gas flame should ignite.
- Slide the button to OFF. The main gas flame and pilot flame should both extinguish.
- Slide the button to REMOTE, then press the ON button on the transmitter to change the system to on. The spark electrode should begin sparking to ignite the pilot. After the pilot is lit, the main gas valve should open and the main gas flame should ignite.

CP (CHILDPROOF) FEATURE

This remote control includes a childproof feature that allows the user to “lock-out” operations from the Transmitter.
- To activate and de-activate the childproof feature, press and hold the ON button and the MODE button at the same time for 5 seconds. The letters “CP” will appear in the TEMP frame on the LCD screen.
- “CP” will appear on the LCD screen if any button is pressed while childproof mode is engaged.
- When this mode is engaged, all auto settings go on without interruption (like thermostat). Only manual functions are prevented.
COMMUNICATION - SAFETY - TRANSMITTER - (C/S - T/X)
This remote control has a COMMUNICATION – SAFETY function built into its software to ensure the transmitter and receiver are communicating normally.

In all operating modes, the transmitter sends an RF signal every fifteen minutes to the receiver indicating that the transmitter is within the normal operating range of 20 feet. Should the receiver NOT receive this signal, the RECEIVER will begin a 2 hour countdown. If the RECEIVER does not receive a signal from the transmitter in 2 hours, the RECEIVER will shut off the appliance. The RECEIVER will then emit a series of rapid “beeps” for a period of 10 seconds. Then after 10 seconds of rapid beeping, the RECEIVER will continue to emit a single “beep” every 4 seconds until a transmitter ON, OFF or MODE Button is pressed to reset the receiver.

LEARNING TRANSMITTER TO RECEIVER
• Each transmitter uses a unique security code. It will be necessary to press the LEARN button on the receiver to accept the transmitter security code upon initial use, if batteries are replaced, or if a replacement transmitter is purchased from your dealer or the factory. In order for the receiver to accept the transmitter security code, be sure the slide button on the receiver is in the REMOTE position; the receiver will not LEARN if the slide switch is in the ON or OFF position. The LEARN button in located on the front face of the receiver; inside the small hole labeled LEARN. Using a small screwdriver or end of a paperclip gently press and release the black LEARN button inside the hole. When you release the LEARN button the receiver will emit an audible “beep”. After the receiver emits the beep press the transmitter ON button and release. The receiver will emit several beeps indicating that the transmitter’s code has been accepted into the receiver.
• To delete all of the transmitter codes on your receiver, press and hold the LEARN button for 10 seconds. Then you will hear a series of beeps, indicating that the receiver’s memory has been cleared.

TRANSMITTER WALL CLIP
The transmitter can be hung on a wall using the clip provided.
• Wood - Drill 1/8” pilot holes and install with screws provided.
• Plaster/Wallboard - Drill 1/4” holes, then install with the screws provided.

BATTERY LIFE
Life expectancy of the alkaline batteries in the transmitter should be at least 12 months. Check and replace all batteries:
• Annually.
• When operating range becomes reduced.
• When transmissions are not received by the remote receiver.
• If the hand held transmitter batteries measure less than 2.5 volts. (Both batteries in combination)

TROUBLE SHOOTING
If you encounter problems with your fireplace system, the problem may be with either the fireplace itself or with the remote. Review the fireplace manufacturer’s operation manual to make sure all connections are properly made. Then check the operation of the remote in the following manner:
• Make sure there is a 110 - volt power source to the transmitter.
• Check batteries in transmitter to make sure contacts are touching (+) and (-) ends of battery. Bend metal contacts in for tighter fit.
• Check if the transmitter batteries are fully charged.
• Be sure receiver and transmitter are within 20'-25' operating range.
• Keep receiver from temperatures exceeding 130 degrees F.
• If receiver is installed in a tightly enclosed metal surrounding, the operating distance will be shortened.
• Make sure the hand-held transmitter and remote receiver are communicating properly (see LEARNING TRANSMITTER TO RECEIVER section).

FCC REQUIREMENTS
NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER’S AUTHORITY TO OPERATE THE EQUIPMENT.

MANUFACTURED EXCLUSIVELY FOR SKYTECH II, INC
Limited Lifetime Warranty

SKYTECH II warrants the SKYTECH REMOTE CONTROL SYSTEM for a Limited Lifetime of the original owner of this system. This warranty is not transferable to another person it is for the original purchaser of the product. Should any part fail because of defective workmanship or material from the original date of purchase, SKYTECH II will repair or, at SKYTECH II option, replace the defective parts.

Replacement parts will be available at no charge for the first (5) five years of this warranty, and will be available at market cost for the Lifetime of the product to that original owner. If SKYTECH II does not have the parts for an individual model, then a replacement SYSTEM will be provided. At no charge for the first (5) five years and sold at market cost for the Lifetime of that product to the original owner.

The Owner must provide a bill of sale, cancelled check, or payment record should be kept to verify purchase date and establish warranty period. Travel, diagnostic cost, service labor to repair the defective SYSTEM, and freight charges on warranty parts to and from the factory will be the responsibility of the owner. SKYTECH will not be responsible for labor charges and/or damage incurred in installation, repair, replacement, or for incidental or consequential damages. Batteries and any damage caused by them are not covered by them are not covered by this warranty.

This warranty does not cover claims, which do not involve defective workmanship or materials.

 Damage to the SYSTEM caused by accident, misuse, abuse, or installation error, whether performed by a contractor, Service Company, or owner, is not covered by this warranty. Modification of the SKYTECH product will void this warranty.

IN NO EVENT SHALL SKYTECH BE LIABLE FOR INCIDENTAL AND CONSEQUENTIAL INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS, ARE LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY. THIS WARRANTY SUPERSEDES ALL OTHER ORAL OR WRITTEN WARRANTIES.

Some States do not allow the exclusion or limitation of incidental and consequential damages or limitation on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific rights and you may have other rights, which vary from state, province, and nation.

How to Obtain Service:
Contact SKYTECH II or your SKYTECH Dealer direct with the following information:
  - Name, Address, Telephone Number of Owner
  - Date of Purchase, Proof of Purchase
    - Model Name, Date Code

Any relevant information or circumstances, e.g., installation, mode of operation when defect was noted.

Warranty claim process will start with all of this information. SKYTECH will reserve the right to physically inspect the product for defects, by authorized representatives.

---

Some relevant information has been left blank for you to fill in. This could include details about the purchase date, the model of the system, the date code, the customer name, address, number of Santa’s Helpers, and credit card information. These details are necessary for the warranty process and should be filled in accurately to ensure the warranty is valid.
Santa’s Helper
Exclusive offer to Skytech Remote Control Owners

This special offer is only provided to customers of Skytech II, Inc. that have purchased a remote control for their Hearth Product. This remote control system can be used for any 110Volt appliance, but perfect your Christmas Tree Lights or any other appliance that is difficult to reach or plug in. Simply plug the receiver into your wall outlet and your appliance into the receiver, push the ON button on the transmitter and you are in business. It’s that easy.

The list price of $29.95 for the Santa’s Helper has been cut almost in half to $15.00 USD for this exclusive offer. Shipping and handling of $5.00 $USD should be added. Send your check, money order or your Visa / MasterCard number, with Expiration Date to our office, along with the warranty information from your remote control for your Hearth Product. You can send this via mail, fax, or e-mail.
